

We promote **spiritual** development by:

Sparking awe and curiosity as pupils explore places using Google Maps and imagine what life is like in different parts of the world.

Comparing their lives with children in other UK and global communities develops empathy, respect and a sense of belonging.

Linking geography with history helps pupils reflect on how landscapes change, encouraging appreciation, reflection and hope for the future.

We promote **moral** development by:

Developing curiosity about how people live together, communicating respectfully and collaborating as responsible local and global citizens.

Using critical thinking to explore human impact, moral choices and consequences to make informed decisions.

Building empathy, creativity and confidence by recognising how actions can create positive change and a better future.

**Personal Development in Geography at Trimley St Mary School**

We promote **social** development by:

Exploring connections between people & places, encouraging respectful communication & social responsibility, including care for environments & the impact of traffic & tourism.

Communicating ideas clearly & using critical thinking to work creatively together & through collaborative fieldwork,

Exploring how environments shape lives & choices; building empathy, fairness & confidence in making positive social choices.

We promote **cultural** development by:

Exploring diverse cultures, traditions & ways of life; asking questions & communicating respectfully about similarities & differences.

Collaborating creatively to understand how culture influences places, identities and communities; through shared enquiries, storytelling, maps & case studies,

Using critical thinking to reflect on cultural perspectives & develop a commitment to respect, inclusion and valuing cultural diversity locally and globally.
